Education

Bharati Vidyapeeth's College of Engineering for Women, Pune

2023 – 2026

Bachelor of Information Technology

CGPA: 9.78/10.0

Core CS: Data Structures & Algorithms, Object-oriented Programming, Operating Systems, Computer Networks, DBMS

Experience

Research & Development Intern | Central Water & Power Research Station, Pune

Jun'25 - May'26

AI-Powered Smart Energy Management System for Electrical Substations

[Repo]

- Codeveloped a hybrid **GRU-Autoencoder** model to detect technical power losses in electrical substations by analysing **77,000+** real-time **SCADA** records from 3 substations.
- Built a full-stack monitoring system using **React.js, Flask REST API** for real-time power loss visualization and alert logging, with a MongoDB backend structured for time-series data.

Cloud Computing & Data Analytics Intern | KasNet Technologies Pvt. Ltd., Pune

Jan'25 – Feb'25

- Built and deployed cloud-based solutions on **Microsoft Azure (VMs, Blob Storage, serverless Functions)** with access control via RBAC and Azure Tags; **earned AZ-900 certification** validating hands-on infrastructure skills.
- Developed data pipelines and interactive **Power BI** dashboards across 3 domain projects (banking, healthcare, retail), transforming and visualizing **10,000+ records** to **reduce manual reporting time by 40%**.

Projects

Track-It - Git-Inspired Version Control System

[Repo]

Tech Stack: Node.js, React.js, AWS S3

- Built a Git-inspired **CLI** and Responsive **React.js** dashboard (deployed on **Vercel**) supporting init, add, commit, push, pull, and revert workflows, with commit-history browsing and file management.
- Architected **cloud-backed** version control by syncing commits to **AWS S3**, implementing a revert mechanism with full audit-trail preservation for safe rollback

Enterprise AI Knowledge & Workflow Agent

[Repo]

Tech Stack: Spring Boot, REST APIs, RAG, PostgreSQL

- Built a **Spring Boot-based** enterprise platform for document management, intelligent knowledge retrieval, and automated workflow execution using **REST APIs, PostgreSQL, and Hibernate**.
- Designed a scalable Controller–Service–Repository architecture with role-based access, document processing, and an AI-powered **RAG** pipeline for context-aware enterprise queries.

Technical Skills

Programming Languages : Java, C, C++, JavaScript, Python

Backend & Web Development : Spring Boot, Spring, React.js, HTML, CSS, Node.js, Express.js, REST APIs

Databases : MySQL, MongoDB, PostgreSQL

Cloud & Tools: Microsoft Azure, AWS S3, Git, GitHub, Power BI, Docker

Achievements & Certifications

- Final year project **selected as TOP-50 projects** nationwide through NES Innovation and received **special recognition award** as "All Women Innovators Team"
- **Copyright Registration** for AI-Powered Smart Energy Management System architecture.
- Microsoft **Azure AZ-900** Certified.
- Competitive Programming: Leetcode-600+ Problems solved, **Rating:1750, Top 14.53%**
- Contributed to **Open Source** projects through GSSoC'25 and **got 4+ PRs** successfully merged.
- **Vice Chair, ACM-W** Student Chapter - Coordinated chapter activities.
